**Participant(s):** Ozan UYSAL

**Summary:** As regards the training course, i think it is generally well structured and informative. The sessions, group assignments and study tours were applicable and relevant to our work as auditors. This course allows not only to obtain knowledge in auditing exchanging experiences and ideas but also to enhance your English speaking talent. Because participants are required to present country papers and should make a brief power point presentation for this purpose. I think it is very important experience for Turkish participants.
